FRIENDS & FOUNDERS

## UPHOLSTERY SELECTION

Friends & Founders’ upholstery collection range a wide selection of fabrics and leathers from leading manufacturers, suitable for contract and residential use. Our improved collection of carefully-selected sustainable fabrics and leathers accord with our environmental profile. A major part of the new collections have the ECO LABEL offering a variety of fabrics made from recycled materials and sustainable –produced leathers. We also offer exclusive collections for customers requiring something special in the high-end segment. Learn more about the collection in the UPHOLSTERY appendix where the standard price group information is included.

COM / COL materials: need to be tested / approved by Friends & Founders, prolonged lead time is expected. Please follow the manufacturers guidelines for maintenance and care. Pressure marks on sensitive fabrics such as velvet are unavoidable but can be removed by steaming according to manufacturer’s instructions.

COLOUR DEVIATIONS FROM SAMPLES MAY OCCUR FOR FABRIC AND LEATHER COLOUR CHARTS.

## LEATHER COLLECTION

The natural leather collection ranges ANILINE LEATHER / SEMI ANILINE LEATHER AND CHROME FREE LEATHER.

All Friends & Founders’ selected European leathers are genuine. Each type of leather has its own characteristics and different quality. Natural marks such as insect bites / scars / neck wrinkles / beauty marks may occur. Colour difference and variation in the natural grain can occur from one leather hide to another, and even within a single leather hide. Consequently over time, the surface will become smoother, shinier and the colour will become lighter. Part of the beauty of living with real leather is that you leave your own personal mark on it. If you care for the leather it will last longer and patinate beautifully over time.

## WOOD COLLECTION

Friends & Founders’ wood collection ranges FSC-certificated SOLID WOOD and VENEER manufactured in Europe.

Our selected natural OAK / ASH and DOUGLAS PINE wood is ideal for furniture and table tops. The characteristics of the wood is the naturally beautiful grain. Natural marks such as wood grain knots and variations in grain patterns can occur.

### SURFACE TREATMENTS

Our non-solvent surface treatments are selected to maintain the natural look and feel of the raw material without compromising the durability. The wood is waxed-oiled or stained with a silk matt, smooth surface treatment for easy maintenance and good durability. The treatments does not protect the surface in full against scratches or discolorations from liquids. Wear and patina will occur over time and maintenance is needed in order to preserve the surface treatment. Polyurethane varnish is available for projects.

### FENIX LAMINATE

F&F use FENIX laminate for table tops since this innovative material is very suitable for interior design applications. Fenix laminates are not only beautiful to look at but, most importantly, they are also a high-tech material, made unique by their characteristics.

FENIX have these characteristics by undergoing a particular series of processes, including a multilayer coating and the use of next-generation acrylic resins, which are hardened and fixed through an Electron Beam Curing process. With low light reflectivity, their surface is extremely opaque, soft touch and anti-fingerprint.

FENIX materials are highly resistant to scratches, abrasion, dry heat, acid-based solvents and household reagents. Thermal healing of superficial micro-scratches is also possible. FENIX surfaces have a unique non-porous external layer, allowing the material to stay neat with simple, everyday care and cleaning methods. They are also suitable for contact with food.

## STONE COLLECTION

The natural stone collection ranges EuropeAN AND SCANDINAVIAN MARBLE – HONED SILK MATT SMOOTH FINISH

Friends & Founders’ selected marbles ranges exclusive genuine marble stone that originates from Europe. The rare green marble is selected from an exclusive quarry in Sweden. All marbles within the collection have their own characteristics with different quality and appearance. Some stones have extraordinary veins and other more homogeneous patterns. Friends & Founders’ marble items has a beautiful silk matt finish which enhances the expression of the natural raw material.

### FRIENDS & FOUNDERS’ SELECTED MARBLES

**KOLMÅRD** – origin Sweden  
*Light green marble with white / dark green veins.*

**BELGIAN BLUE** – origin Belgium  
*Black monochrome marble, appear without veins. Fossils occur.*

**NERO MARQUINA** – origin Spain  
*Black marble with white veins.*

**CARRARA** – origin Italy  
*Light marble with grey or darker veins.*

**TRAVERTINE** – origin Italy  
*Beige marble, visibly porous, giving it a more natural, textured look.*

**PELE DE TIGRE** – origin Portugal  
*Light marble with grey or darker veins. Coloured veins may occur.*

Marble is a genuine product and natural marks are therefore common. Calcareous spar: Looks like crushed crystal and stems from open water veins in the stone where the lime from the water has settled. Dark parts / Veins: Caused by deposits of a mineral. The material’s porous acid-sensitive nature makes it prone to etching and staining. Wear and patina will occur over time. With right treatment you can ensure it will look its best for many years and patinate beautifully over time. Reservations are made for product or sales material imagery that deviates from the sold items. The appearance can change from time to time depending on availability of the raw material.
